THE 2000 MW POWER PARADOX AT SOMA CITY

SOMA CITY TOHOKU "COAL" PLANT CAPACITY: 2000 MW

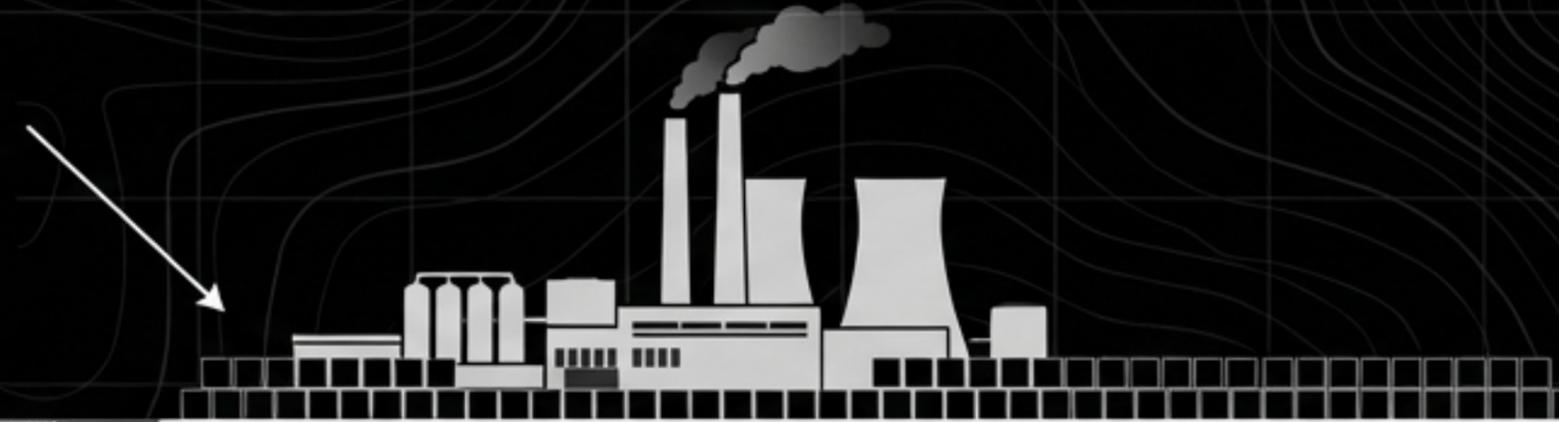

“ INTERCEPTED TESTIMONY: “This line doesn't go to Tohoku. It goes only to Fukushima Number One. There is a lot of work going on here that outsiders don't know about.” ”

PEELING BACK THE EARTH AT SOMA CITY

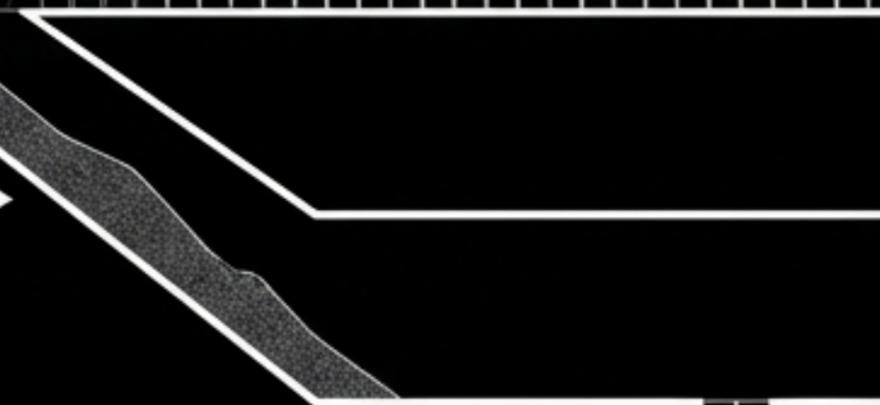

SURFACE LAYER: THE DECOY

Fake coal plant footprint layered with 3-ton black radiation waste bags to camouflage the site from overhead satellite thermal sensors.

DESCENT VECTOR

45-degree subterranean gravel access ramp.

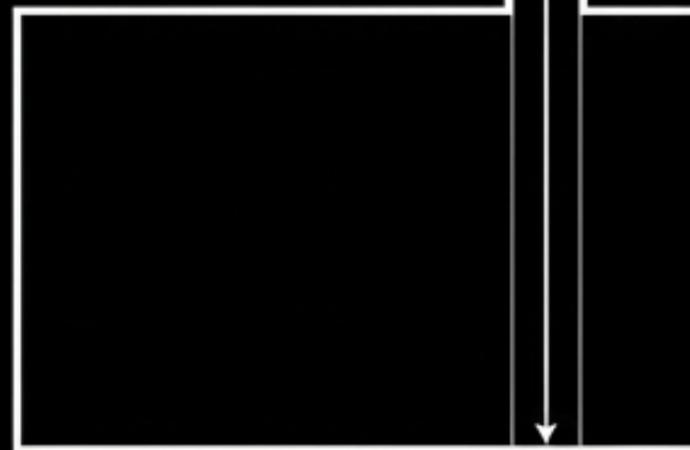

LEVEL 01: INITIAL CHAMBER

3-story deep hidden industrial staging area.

LEVEL 02: DEEP SUBTERRANEAN

7-story deep high-security void.

CLASSIFICATION: ALLEGED DEEP UNDERGROUND WEAPONS LAB

1,000 FROZEN BODIES

INCIDENT REPORT:

Source: Tohoku Medical University College Morgue

Event: Post-Tsunami Subterranean Flooding

Casualties: Covert workers and soldiers trapped in the deep underground weapons lab during a localized meltdown of high-level waste.

UNEXPLAINED METEOROLOGICAL PHENOMENA

FRAME 01: UNNATURAL ATMOSPHERIC DISCOLORATION

FRAME 01: UNNATURAL ATMOSPHERIC DISCOLORATION

Neon pink, yellow, and purple skies dominated the region one month post-disaster, defying standard meteorological models.

FRAME 02: ANOMALOUS GROUND-LEVEL CIRRUS FORMATIONS

FRAME 02: ANOMALOUS GROUND-LEVEL CIRRUS FORMATIONS

Cirrus clouds, native only to extreme upper atmospheres, observed forming directly at ground level above the plant footprint.

THE SHADOW NETWORK SURVIVES

The Fukushima exclusion zone is not merely the site of a tragic civilian energy accident. It serves as the geographic containment shell for a century-long, covert military-industrial complex.

The radiation blanketing the Pacific is not just the fallout of a natural disaster—it is the wreckage of a clandestine weapons program hiding in plain sight.
